# How to Order Replacement Parts for South Bend Lathes

This parts list has been prepared especially for the lathe bearing the serial number which appears on the front cover. It should be considered as a part of the lathe equipment and be kept permanently where it will be readily accessible so the correct part numbers can be given when replacement parts are ordered.

The best way to order replacement parts is to send the old part to the factory with the order. This will avoid delay or possible error.

If it is inconvenient to return the old part, be sure to give the following information:

- (1) Serial number of lathe.
- (2) Correct number and name of part.
- (3) Quantity.
- (4) Specify length of wire, cable, conduit, wicking, or hose as the part number does not indicate length.
- (5) Specify dimensions of gasket material as the part number indicates type of material and thickness only.

If the part needed can not be located in this parts list, send a sketch of the part showing all principal dimensions.

## Specify Serial Number of Lathe When Ordering Parts

The serial number of each lathe is stamped on top of the lathe bed between the V-way and flat way at the tailstock end. This number is an index to the size, type, and model of the lathe. Always specify the serial number on each order for replacement parts or attachments.

## Terms and Prices

All orders for replacement parts will be shipped C.O.D. unless remittance in full is sent with the order.

All prices are F.O.B. South Bend, Indiana, and will be quoted on request.

## Special Instructions

### How to Order Gears

When ordering replacement gears, be sure to give all of the information required as listed and illustrated below.

#### When Ordering Gears Specify—

Serial Number of Lathe	Diameter "D" in Inches
Number and Name of Part	Width "W" in Inches
Quantity	Keyway "K" in Inches
Number of Teeth	Hole "H" in Inches

The illustration above shows two views of a gear with parts lettered for use when indicating specifications on your order.

### How to Order Threaded Parts

When ordering threaded parts, other than commercial parts such as standard screws, bolts, and nuts, be sure to give all of the information required as listed below.

#### When Ordering Threaded Parts Specify—

Serial Number of Lathe	Number of Threads per Inch
Number and Name of Part	Kind of Thread:
Quantity	Acme Thread
Outside Diameter of	U. S. Standard Thread
Threads in Inches	Sharp "V" Thread
	Right-or Left-hand Thread

### Repair Parts Supplied for South Bend Lathes Only

The lathe parts listed in this parts list can be supplied only for use on South Bend Lathes. We are not in a position to supply parts for other makes of lathes or for use on jigs, fixtures, special machines or equipment.
